Paint Inspectors

Building Maintenance

Window Cleaning
Glass Replacement
Inspection Repairs
Guttering Replacement
Earth Cable Installation / Replacement

Geotechnical Services

Rocksaling
Install Rock Netting
Percussion Drilling
Grouting

WE RISE....

To any challenge!

Cost Effective

Roxby Technical Services offers an alternative to the traditional costs of conventional access systems (i.e. scaffolding & cherry pickers) by utilising industrial rope techniques to access difficult locations. Our skills provide a reduction in man-hours, increased efficiency and less interference with existing operations. Rope Access is fast becoming the solution of choice for construction, petro-chemical and environmentally sensitive areas such as sites of special scientific interest.

Roxby have a wealth of knowledge and experience gained over many years working in the Oil and Gas Industry throughout the world, both onshore and offshore. Our specialist access equipment is regularly load tested and easily mobilised in light-weight freight boxes and rucksacks. Our Technicians are equipped with industrial digital cameras, which enable all phases of the task to be recorded and submitted along with the final reports.

Safety

Endorsed by an impeccable safety record, our methods are fully recognised by the Health & Safety Executive and exceed statutory requirements laid down by the Industrial Rope Access Trade Association) IRATA
