

Rope Access Division

A new perspective on remote access

Innovative Engineering Solutions

ROXBY

Company Purpose

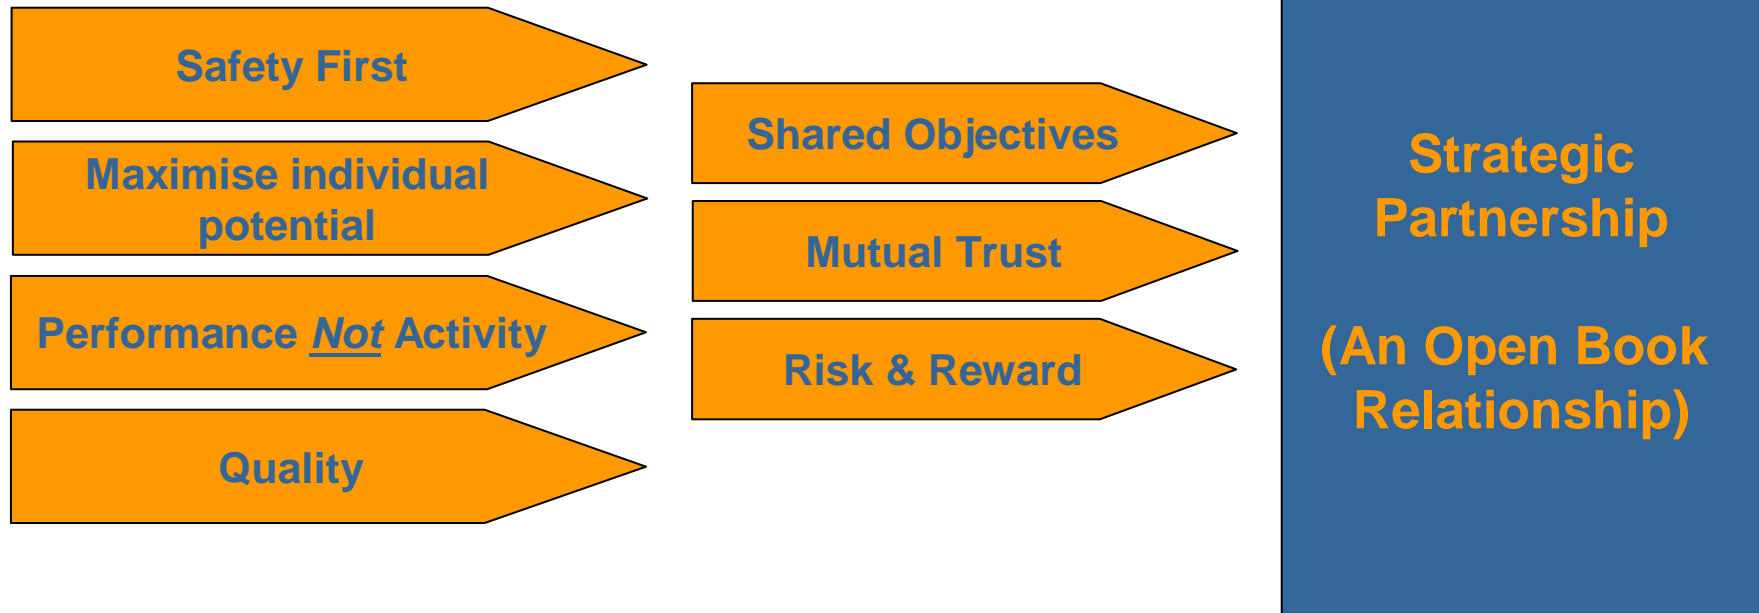

Roxby provides Asset and Facilities Management Services, *tailored to the customer's requirements*, which can be *proven to add value* for the customer.

Our values and aims

ROXBY

A-Z of Where We Work

Aerials

Bridges

Cranes

Dams and Derricks

Exhaust Stacks

Farm Silos

Gas Plants

High Structures

Inside confined spaces

Jetties and Piers

Kilns and Chimneys

Lighthouses

Monuments

Nuclear Plants

Offshore Installations

Power Stations

Quarries

Railways and roofs

Stadiums

Telecommunication Masts

Underground

Vessels and Viaducts

Wind farms

ROXBY

Our Services

Fabric Maintenance

- Corrosion under insulation
- Grit Blasting, wet and dry systems
- Ultra high pressure water jetting
- Needle gunning
- Painting
- Insulation and cladding removal and repair.

ROXBY

Our Services

Mechanical Repair & Maintenance

- Steelwork repairs/replacement
- Coded Welding
- Bolt inspection and replacement
- Plating, Pipefitting, burning, grinding
- Plant Mechanical repairs and replacement
- Structural Construction and repairs
- Installation /replacement /repairs on pipe-work and drains.

ROXBY

Our Services

Inspection & Testing

- Visual
- Photographic and Video
- Ultrasonic
- Radiography
- Thermography
- Neutron Backscatter
- Magnetic Particle and Liquid Penetrate inspection.

ROXBY

Our Services

Mast and Antennae

- Guy Wire Replacement
- Refurbishment
- Maintenance

Rock Netting and Soil Erosion

- Awkward, steep and vertical cliff
- Geotechnical ground surface stabilization
- Soil Nailing
- Ground Anchor Installation.

ROXBY

Our Services

Building and Structural Maintenance

- Masonry and stonework pointing, repair and cleaning.
- Concrete and Steelwork inspection
- Steel Erection/demolition
- Emergency Escape installation and IRM
- Concrete Repair
- Surveys and inspections, concrete analysis.

ROXBY

Our Services

Electrical and Instrumentation

- Hazardous areas
- Loop checking
- Cable Running
- Equipment installation
- Production support

ROXBY

Innovative Engineering Solutions

Controlling Risks

- We are determined to protect people, assets, equipment and the environment.
- By using effective risk management to eliminate hazards and control each process of operation.
- The containment of debris and emissions, strict control of hazardous substances demonstrate our sensitivity to environmental issues.
- Location factors that our work is likely to influence or be influenced by are considered. We recognise the local context.
- Interfacing with ongoing site work, routine commercial or civic operations, minimising disruption.

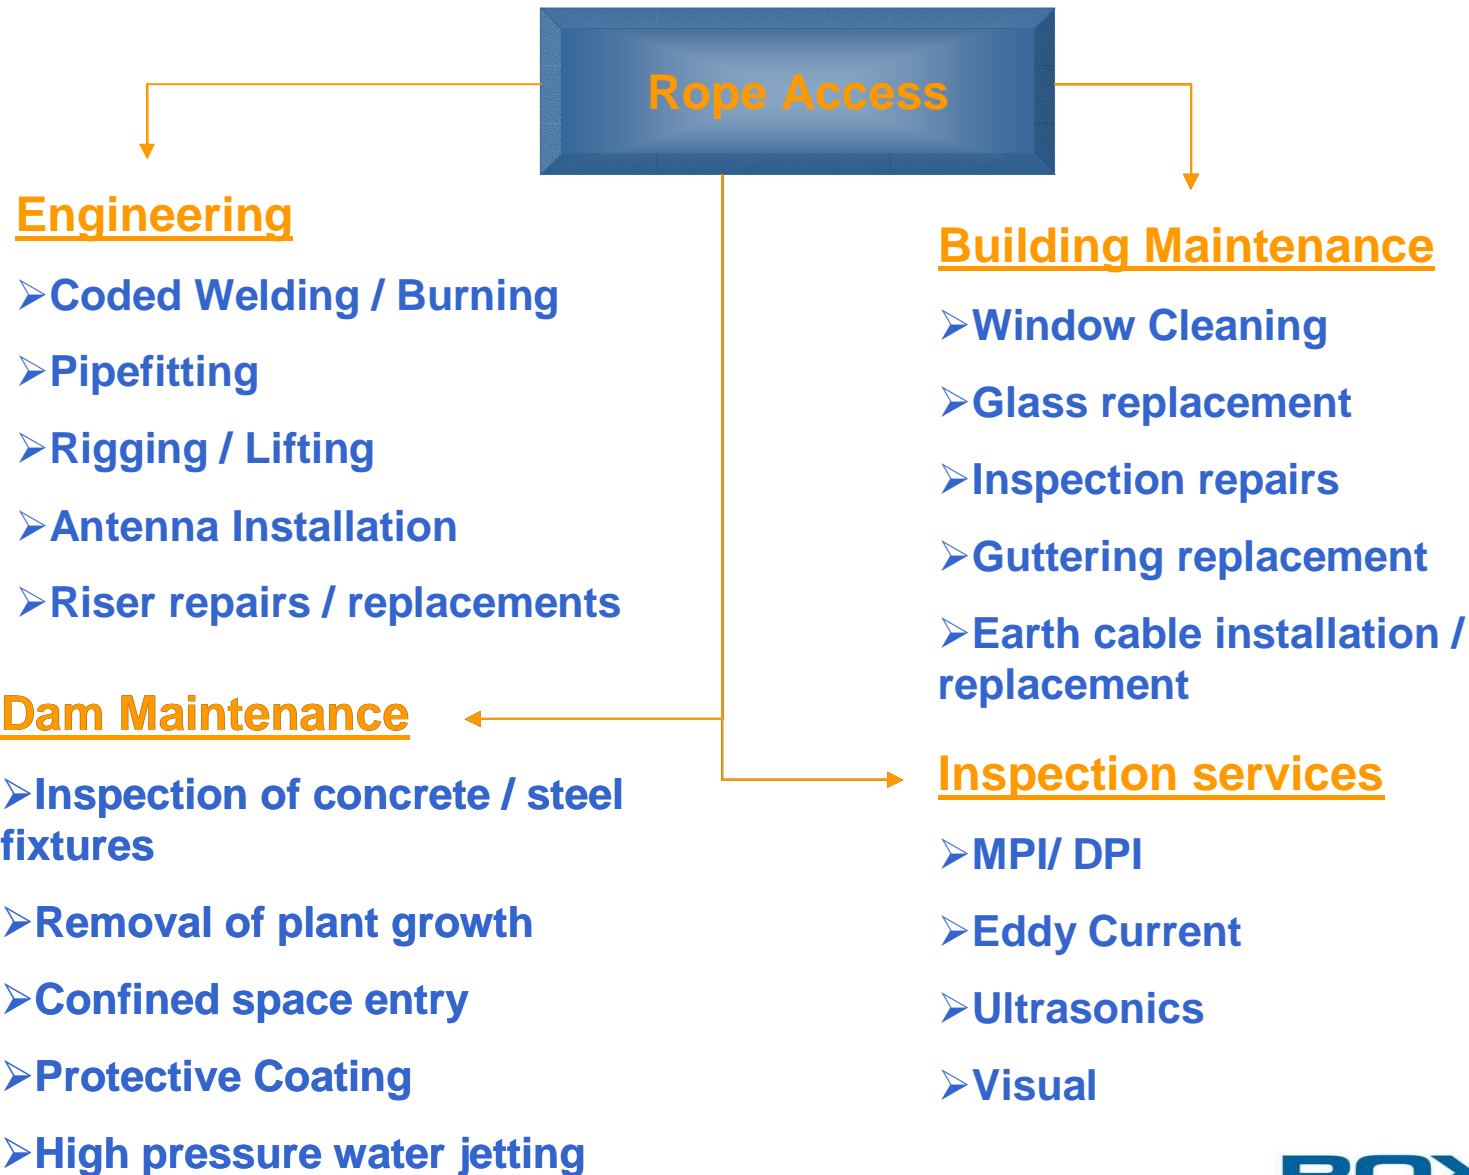

ROXBY

Fundamental Safety & Quality

- **Our Technicians:** Competency, experience, certification, training, multi-skilled, work procedures and practices, behaviour, risk assessment and method statements.
- **For other Contractors:** Risk assessment, permit to work systems/safe systems of work, co-operation.
- **For the general public:** Risk assessments, restricted access, containment of dropped objects
- **Assuring Quality and Improvement:** Company accreditation, ISO 9001:2000, IRATA, EMTA, JTL, C&G, Edexel

```

Specialist Coating Services

- Grit Blasting / Quill Blasting
- UHP Water blasting
- Spray paint applications
- Paint inspections

Geotechnical services

- Rockscaling
- Install rock netting
- Percussion drilling
- Grouting

Other services

- Asbestos Surveys / Removals
- Insulation installation /Removal
- Electrical services

Rope Access for Engineering

ROXBY

Innovative Engineering Solutions

WE RISE.....To any challenge.

COST EFFECTIVE

Roxby Technical Services offers an alternative to the traditional costs of conventional access systems (i.e. scaffolding & cherry pickers) by utilising industrial rope techniques to access difficult locations. Our skills provide a reduction in man-hours, increased efficiency and less interference with existing operations. Rope Access is fast becoming the solution of choice for construction, petro-chemical and environmentally sensitive areas such as sites of special scientific interest.

SAFETY

Endorsed by an impeccable safety record, our methods are fully recognised by the Health & Safety Executive and exceed statutory requirements laid down by the Industrial Rope Access Trade Association) IRATA
